### Testimony

Just read the article about passing legislation for cameras in the facilities. Why is Halawa not included? There are drug and sex trafficking running rampant and inmates sexually exposing themselves to staff. The sex trafficking mostly involves transgender inmates but other vulnerable inmates as well. Do you not care about our transgender inmates? Do our vulnerable male inmates not deserve consideration? Do our staff, especially females working with male inmates not deserve protection as well? When you have an acting chief of security at HCF allowing all this to happen and is the one ensuring coverups are successfully, there will continue to be more victims of sexual assaults and more deaths from the drug trafficking and overdoses. When does the commission and state start caring about Halawa? Why are they constantly left out? Do something. Every time I have tried to speak up I have been retaliated against. I have been threatened, harassed, and silenced. It doesn't help when I have zero support from administration, legislators, and a commission who is supposed to be protecting staff and inmates. Shame on you.
